

## Margaret River Subdivision, Ironstone Place Lots 41&amp;42

### Project Description

Leeuwin Civil was engaged to provide subdivision works for a new housing estate at Ironstone Place in Margaret River.

Works consisted construction of a cul-de-sac road with rural driveways for lot access, along with the installation of stormwater drainage within a running creek.

Leeuwin Civil also constructed a new fire access track and supplied and installed a fire tank, as well as installing underground services for power and communications.

### Scope of Works

- road construction;
- stormwater drainage;
- rural driveway construction;
- comms and power installation;
- fire access track construction; and
- supply and installation of a fire tank.
