

## Cowaramup Primary School Car Park Construction

### Location

Cowaramup, WA

### Dates

May 2018 - July 2018

### Client

Shire of Augusta,  
Margaret River

### Designer

Shire of Augusta,  
Margaret River

### Project type

Subdivision Works

### Cost

\$150,000

### Project Description

Leeuwin Civil was engaged by the Shire of Augusta Margaret River to construct a 200m concrete footpath, two new bus bays, and 34 new car parking bays to raise the standard for parking and pedestrian access at the Cowaramup Primary School.

Stringent traffic management plans were put into place to carefully manage peak drop off and pick up times for parent and bus services, to manage safety. This was achieved in close consultation with the school, parents and bus services.

Leeuwin Civil was also able to assist the Shire by proposing an alternative pavement depth when it was established the original depth did not meet budget restrictions. As a result of this change works were completed to time and on budget.

### Scope of Works

- vegetation clearing;
- supply and installation of a new 2m wide footpath;
- minor drainage works to connect into the existing drainage; and
- box-out of existing areas and place new base, seal, kerbing and asphalt

### Job Number

1998
